

QUALITY SPECIALIST FAI AND RAMS

 **Adres:** Zdrój 49a, 62-065 Grodzisk Wlkp.  **Obszar:** Quality  **Wymiar czasu pracy:** Pełny eteat

ABOUT THE ROLE

We are seeking an experienced Quality Specialist to take ownership of FAI documentation, RAMS-related activities, and quality process development. This role is dedicated to ensuring that products and processes meet customer, regulatory, and internal quality requirements from early project phases through serial production. As a key member of the Quality organization, you will work closely with Engineering, Production, Supply Chain, and Project teams to define robust processes, support risk-based thinking, and ensure high-quality standards are embedded into daily operations. The role requires strong analytical skills, technical understanding, and the ability to operate independently in a structured, international environment. You will actively contribute to process optimization, compliance, and continuous improvement initiatives, acting as a quality expert and partner for cross-functional teams

KEY RESPONSIBILITIES

- Ownership of FAI documentation processes, including preparation, review, approval, and maintenance in line with customer and project requirements.
- Coordination and execution of First Article Inspections in cooperation with Engineering, Production, and Supply Chain.
- Active support and implementation of RAMS requirements within quality and production processes.
- Analysis, development, and continuous improvement of quality and manufacturing processes.
- Identification of process risks, non-conformities, and improvement opportunities using structured problem-solving methods.
- Participation in root cause analysis and definition of corrective and preventive actions.
- Cooperation with cross-functional teams to ensure process compliance and robustness.
- Preparation of quality analyses, reports, and process performance summaries for internal and external stakeholders.
- Support of continuous improvement initiatives aligned with Lean and operational excellence principles.

QUALIFICATIONS

- Bachelor's degree in Engineering, Industrial Management, Quality Management, or a related technical field.
- Proven experience in Quality, Manufacturing, Process Engineering, or similar roles within an industrial environment.
- Strong knowledge of quality documentation, FAI processes, and process-oriented quality methodologies.
- Experience with RAMS requirements or willingness to develop in this area.
- Excellent analytical and problem-solving skills with a structured, process-driven mindset.
- Ability to work independently as well as collaboratively in cross-functional teams.
- Strong communication skills and ability to work with internal and external stakeholders.
- Very good command of English (B2), both written and spoken.
- Knowledge of Lean, Continuous Improvement, or Six Sigma tools is a strong advantage.
- Quality or process-related certifications are an asset in a team.

WE OFFER

- Becoming a member of a motivated and enthusiastic team and shape and develop the future of our growing organization
- Dynamic and collaborative work environment.
- Competitive salary and benefits packages.
- Work in an international environment within a long-term oriented family-owned business
- Opportunity to develop within the organization
